 [@KenilGondaliya](#)

 [/kenil-gondaliya](#)

### SKILLS

- **Programming Languages:** Java, JavaScript, C#, C++, Python
- **Web Technologies:** RESTful APIs, .NET Core, Spring Boot, React.js, Express.js, Node.js
- **Core Concepts:** Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Database Management Systems (DBMS), Problem Solving
- **Cloud & DevOps:** Docker, Kubernetes, AWS Cloud Services (Basic Knowledge), Containerization, CI/CD Concepts
- **Databases:** MySQL, PostgreSQL, Microsoft SQL Server, MongoDB, SQL
- **Development Tools & Platforms:** Git, GitHub, Visual Studio, Visual Studio Code, IntelliJ, Postman, Linux

### EXPERIENCE

#### ❖ Intern (Backend Developer) | Webito Infotech (Jan 2025)

- Worked on backend development using **Node.js, Express.js, and MongoDB** within the **MERN stack**, collaborating with frontend (React.js).
- Built and maintained **RESTful APIs** for systems like Railway Booking and Worker Services platforms.
- Designed **MongoDB schemas** and applied efficient data modeling and DBMS concepts.
- Implemented **authentication & authorization** using JWT and RBAC.
- Handled **API integration, testing, debugging, and performance optimization**.
- Collaborated in an **Agile team environment** to deliver features on time.

### ACADEMIC PROJECTS

#### ❖ TripGo – Bus Reservation System

- Developed TripGo – Bus Reservation System using **Java, Spring Boot, Spring Security, Hibernate/JPA, Thymeleaf, and MySQL**.
- Implemented **JWT Authentication** and **OAuth2 Login (Google & GitHub)** with secure **Role-Based Access Control (RBAC)** for Admin and Customer modules.
- Built and integrated **65+ RESTful APIs** for authentication, bus booking, route search, schedule management, ticket reservation, customer management, and admin analytics.
- Designed and developed a complete **Admin Dashboard** for managing buses, routes, schedules, bookings, customers, seat pricing, and booking statistics.
- Integrated **PDF ticket/receipt generation** using iText and OpenHTMLToPDF libraries.
- Applied **MVC architecture**, DTO mapping, pagination, validation, exception handling, JWT filters, and scalable backend development best practices.

## ❖ Praava – Law Firm Management System

- Developed a **multi-tenant SaaS platform** with complete data isolation, supporting multiple law firms on a single application instance.
- Implemented **JWT authentication, refresh tokens, role-based access control** (Owner, Admin, Manager, Staff, Viewer), and secure authorization workflows.
- Designed and developed **90+ RESTful APIs** across core modules including **Matters, Contacts, Tasks, Calendar, Documents, Communications, Billing, Dashboard, and Settings**.
- Built key legal operations features such as matter management, contact management, task tracking, document management, calendar scheduling, invoicing, and payment tracking.
- Applied clean architecture principles using **Repository Pattern, DTOs, async programming, exception handling middleware, email automation, and subscription management**.

## ❖ Oatly - Plant-Based Dairy Milk Product Store

- Built a **full-stack MERN application** with Admin, User, and Delivery roles.
- Implemented **JWT, OTP authentication, and RBAC** for secure access.
- Developed core features like **product listing, cart, and Razorpay payment integration**.
- Created **role-based dashboards** for order tracking and management.
- Designed a **responsive UI** and deployed as a desktop app using Electron.js.

## EDUCATION

- **MSc ICT** | J.P Dawar Department | VNSGU (2025-2027)
- **BCA** | ASSC College | VNSGU CGPA: **7.27** | (2022-2025)
- **XII** | (H.S.C) | MNJ Patel School **81.2%** | 2022
